CHOICE AND RARE HARDY PLANTS

Wolcott Nurseries Jackson, Michigan

Members Women's National Agricultural and Horticultural Association

Attention Southern Customers.

We would like to call attention to the fact that our springs are very late (one of the trying features of operating a Nursery in a cold climate) and it is impossible for us to make early shipments, as our stock is almost entirely field grown. It is usually along in May before vegetation has trade enough start to permit us to commence digging.

We beg your indulgence, for your plants will quickly make up lost time when moved to a warmer situation.

E wish to express our appreciation of the interest shown by garden lovers in the pioneer work we are doing in this country. It is a good deal of an undertaking to bring to the public a collection of choice varieties which are little known by the majority of gardeners. But the interest is great and the desire to learn very sincere, which encourages us to forge ahead and give the people in our own America the opportunity to add to their gardens the choicest of the European gems. And as they become better known, the only wonder will be that we have deprived ourselves of the pleasure of growing them for so long a time.

We specialize on the desirable new and rare varieties as they make their appearance abroad or in this country and our plants are strong, vigorous stock and, grown in our trying climate, we can assure their hardiness anywhere.

We are carrying a large stock of the choicest rock plants and send out stock that is sturdy and with **good roots**, the prime requisite with any plant. But please remember they are not hollyhocks and must of necessity be small, when their full stature is often only two to four inches.

We guarantee our plants to be true to name and description, but it is obviously impossible to guarantee they will grow after leaving our hands. We are always glad, however, to give all the assistance possible to our patrons by giving them any information desired as to the special requirements of any plant.

Any damage in transit or any shortage must be reported immediately to receive consideration.

We shall be glad to receive inquiries for any plants not included in this list, as we have small stocks of many choice and rare varieties.

TERMS—Cash with order, unless it is desired to open an account with us. In that case, please send financial references.

No account opened for less than an initial order of \$10.00.

Not less than six plants of the same variety supplied at the dozen rate.

Rock Gardens

The object of a rock garden is to enable one to grow flowers that have their homes in the high mountains where snows are deep and summer very short. To be sure, all plants grown in the rockery are not natives of the alpine regions, but the great majority are, and while the beginner is apt to feel that this is a most difficult branch of gardening, it is only necessary to begin with the many easy subjects to find it not only comparatively easy but immensely fascinating and one that opens up entirely new delights in gardening.

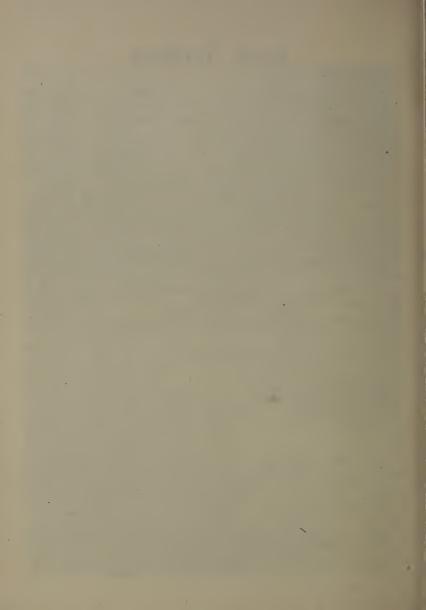

We cannot all, of course, have extensive rock gardens; nor is it necessary, for a wonderful collection of rock plants can be grown in a small space. The most of us have a wall or bank that can be converted into a most bewitching spot with the aid of rock plants.

As a rule, alpine plants are so miniature that they at once appeal to the protective instinct and while they appear so delicate as to make one feel they must be most difficult to grow, many of them are of as easy culture as a rose. As to the more difficult kinds, one need not attempt these until their experience grows a little and it is always an incentive to greater effort to know there are delights just beyond us.

It is not necessary to have expense in order to have a delightful rock garden but rather that we turn our attention to the soil and site for the treasures we wish to possess. It must be borne in mind that rock plants are very deep rooting and so need plenty of good soil and extensive root runs, under rocks. Also that in most of cases the surface needs to be kept covered with small stones and that in all cases care should be taken that the rain supply is not cut off by overhanging rocks.

We have not listed any plants too difficult for the ordinary gardener to grow, as we realize we have few specialists on alpine plants in this country at the present time but as our garden lovers become acquainted with the charms of alpine plants, we prophecy there will be many such enthusiasts.

We will always be glad to give lists of plants for special places, free of charge, provided we have the requests between November 1st and March 1st.

	ch.	Doz.
ACHILLEA—Milfoil or Yarrow		
Hardy Perennial		
Well known border plants, suitable for dry and sunny places.		
A. ageratifolia—Tufted growth with silvery leaves and white flowers. Blooms in May and June. Fine for rockery. 3 in\$.50	\$ 5.00
A. Clavennea—Compact tufts of silvery foliage with a profusion of white flowers from July to Sept. Rockery	.50	5.00
A. ptarmica "Boule de Neige"—An improved variety of this useful plant, having very double flowers of a purer white than the type\$.25	\$ 2.50
	.20	2.00
ACONITUM—Monkshood		
Hardy Perennial		
Aconitums are very stately and beautiful plants for the hardy border. Exceedingly valuable on account of their late bloom as well as for planting in shade, as they will flourish even under trees. Thrive best in very rich soil and prefer not to be disturbed when once es- tablished.		
A. Fischeri—Semi-dwarf variety with large, pale blue flowers. Commences to bloom in September\$	0.5	4 0 50
A. Sparks' Variety—Very dark blue. Blooms early	.35	\$ 3.50 3.50
A. Wilsoni—Very handsome variety introduced from China by Mr. Wilson. Large, violet-blue flowers		
from September until frost	.50	5.00
ALYSSUM—Mad Wort		
Hardy Perennial		
Beautiful, showy plants for rock work, bedding, etc. They like a sunny position and well drained soil.		
A. argenteum—Dense growth. Leaves silvery beneath, flowers yellow in clustered heads, all summer. About 15 in.	.50	5.00
A. orientale—Very showy variety, growing about a foot high and bearing large corymbs of bright yellow		
flowers\$.20	\$ 2.00

I	Each.	Doz.
A. saxatile citrinum—Very attractive variety with paler yellow flowers than the type	.20	2.00
A. "Silver Queen"—A very beautiful variety from England. Masses of pale yellow blooms	.35	3.50
A. serpyllifolium—Very dwarf, 4 inches to 5 inches	.55	3.30
high, with racemes of pale yellow flowers and rough, hoary leaves. Charming for the rock garden. Very		
rare	.50	5.00
A. spinosum—A woody stemmed plant with silvery leaves and numerous small, yellow blossoms. About		
6 in. high and very branching habit. A gem for the rock garden	.50	5,00
A. spinosum roseum—A very choice rose colored form	.50	3.00
of the above. Very scarce	.75	7.50
ANCHUSA—Alkanet		
Hardy Perennial		
Anchusas grow readily in ordinary soil in sunny sit-		
ations but quickly respond to good feeding. Their large hairy leaves and tall spikes of beautiful blue flowers		
make a fine background in borders and Physostegia is		
very effective planted in front of them, as the latter takes their place when through flowering.		
A. italica—"Dropmore Variety"—A beautiful variety		
of the Italian Alkanet with numerous flowers of deepest gentian blue. In good soil will reach a height of		
six to seven feet with numerous side branches, making		0>
a most imposing plant. Requires staking	.25	\$ 2.50
tical with above execpt color	.35	3.50
A. italica—"Lissadell Variety"—A recent introduction Flowers clear blue, very large; very floriferous	.35	3.50
A. myosotidiflora—A new and very charming variety	.00	0.00
of Anchusa, its dwarf habit making it suitable either for the rockery or front of the border. Quantities of		
bright blue flowers in May and June	.35	3.50
ATITUATE Managements		
ATHEMIS—Marguerite		
Hardy Perennial A. tinctoria—A very desirable plant for the hardy gar-		
den with pyrethrum-like foliage and a profusion of		
golden yellow flowers all summer. Fine for cutting	.25	2.50
A. montana—A white flowering variety of the above	.25	2.50

ANTIRRHINUM—Snapdragon Hardy Perennial	acii.	D02.
The ordinary snapdragons are of too coarse growth to be admitted to the rock garden, but there are two or three species that are very charming in June. A dry, sunny spot and well drained soil are essential to success.		
A. Asarina—A trailing plant from the south of France with very attractive foliage and creamy white flowers\$.35	\$ 3.50
A. glutinosum hybridum—A charming strain of lovely colors, very valuable for the rock garden	.35	3.50
A. sempervirens—A beautiful trailing plant for the rock garden. Flowers white with purple blotch	.35	3.50
ANTHYLLIS—Vetch Hardy Perennial A. montana—Somewhat shrubby plant about one foot high with silky foliage and dense heads of pink blossoms. Very easy culture and much prized for the rock garden	.50	\$ 5.00
AQUILEGIA—Columbine		
Hardy Perennial		
The Aquilegias need no praise; they appeal to everyone by their grace and the beauty of their flowers, the colors of the new hybrids being particularly handsome. All the Columbines may be used on the rockery, but it is better to leave the larger species and their varieties to the border, although some of them are very attractive when perched on some high spot.		
They thrive in shade or sun but prefer a rich, well-drained soil in partially shaded position. If not allowed to go to seed and not covered too heavily in winter, they will flourish for years and will not change their colors. Coal ashes put around the crown in the fall will help to prevent their decay.		
A. alpina—A charming species from Switzerland and best suited to the rockery. Beautiful blue and white flowers. Very rare	.50	\$ 5.00

TO DESCRIPTION OF THE PROPERTY		
_	ach.	Doz.
A. cærulea—True—Lovely white and blue flowers \$.25	\$ 2.50
A. cærulea—"Mrs. Nicholls"—A fine novelty. The flowers are long spurred and immense size. Beautiful coloring of Stuartii, with somewhat better constitution	.50	5.00
A. flabellata nana—Very dwarf white variety. The first to bloom in spring. Fine for rockery or edging	.25	2.50
A. "Silver Queen"—New. A very beautiful variety raised in England. Large, elegant flowers with long spurs, white faintly tinged rosy sapphire; 2 ft	.50	5.00
A. "White Lady"—A beautiful variety of cærulea with white flowers and graceful foliage; 2 ft	.50	5.00
A. canadensis—The native bright red and yellow columbine	.20	2.00
A. chrysantha—Bright yellow, long spurred flowers	.20	2.00
A. oxysepala—Dwarf and early flowering. Very attractive with flowers of blue and white with yellow centers. Very new	.50	5.00
anthers. Gem for the rockery	.50	5.00
A. Viridiflora—Rare and interesting species with greenish flowers. Very fragrant	.50	5.00
A. Long spurred Hybrids—Selected from the finest long-spurred varieties obtainable in Europe; strains that have received the highest awards at the Royal Horticultural Shows in London. They range in color from cream white to delicate lavender, blue, delicate pink, rose, deep purple and pure yellow; 2 ft	.25	2.50
ARABIS—Rock Cress		
Hardy Perennial		
One of the most common of rock plants. Ordinary soil is suitable but they must have a sunny position. We offer the best of the many varieties.		
A. alpina superba—Large, pure white flowers. Fine for edging and for rockery\$.20	\$ 2.00
A. aubrietioides—A beautiful variety of rock-cress,	25	9 50
bearing a profusion of delicate pink flowers	.35 .20	3.50 2.00
A. rosea—Very dwarf species with an abundance of		
rose colored flowers	.30	3.00

WOLCOTT NUKSLKILS		
	Each.	Doz.
ARENARIA—Sand Wort		
Hardy Perennial		
As their name implies, these plants do best in sand and full sun. Beautiful and of easy culture, they are most at home in the rock garden.		
A. Balerica—Creeping plant with dark green foliage and white blossoms. A gem for cool, shady places in the rockery	.25	2.50
A. cæspitosa—A close tufted plant of mossy growth, studded with white flowers all summer. Charming for the rock garden	.20	\$ 2.00
A. gracills—Very new and as its name indicates, of slender, graceful growth. Fine rock garden plant A. montana—Creeping variety, forming mounds of	.25	2.50
green which in early summer are covered with large white blossoms. Indispensable for the rockery	.25	2.50
ARMERIA—Sea Pink or Thrift		
Hardy Perennial		
Small perennials, with leaves in rosettes close to the ground. Very easy culture, preferring a sunny position in light soil.		
A. caespitosa vera—Very rare, Spiny leaves, forming		
very compact rosettes. Pink flowers. Rockery	.50	5.00
A. cephalotes—Long, narrow foliage with heads of		
bloom of light rose color on long stems. Very attrac-	.25	2.50
A. cephalotes rubra—Flowers a deeper pink	.25	2.50
zaczenia zacza zaczenia zenia zaczenia zeroa		
ARTEMESIA—Lactiflora Hardy Perennial		
A recent introduction and a most valuable addition		
to the hardy border. Foliage very graceful, almost like		
a Spirea. Flower stems from three to four feet high, bearing panicles of very fragrant white blooms	.25	\$ 2.50
ASTER—Dwarf Alpine		
Hardy Perennial		
A. alpinus—Very effective plants for the rock garden or edge of hardy border. Bear large, showy purple flowers in May and June	.20	\$ 2.00

. F	ach.	Doz.
A. alpinus himalaicus—More dwarf than the type and bearing a profusion of lilac blue flowers. Very		502.
choice	.35	3.50
A. alpinus Magnificus—Handsome variety with pure white flowers	.25	2.50
A. subcærulea—A very handsome dwarf aster. Tufted foliage, slightly hairy, with large, solitary flowers of pale blue with golden centers, making a most beautiful		
combination	.25	2.50
ACCUSED DO NO 1 CO.		
ASTILBE—Meadow Sweet		
Hardy Perennial		
Handsome border plants, especially suited to moist or half shady places. Extremely graceful and not known as well as they should be.		
A. Ceres—Delicate rose-colored flowers with silvery		
sheen\$		\$ 3.50
A. Etna—Beautiful rose pink blooms. Very new	.50	5.00
A. grandis—A grand species, growing five to six feet	05	2.50
tall and bearing immense panicles of white flowers	.25	2.50
A. Rubens—A recent introduction of great beauty producing large panicles of the deepest rose colored		
blooms	.50	5.00
A. Salmon Queen-Beautiful salmon pink	.35	3.50
A. Vesta—Graceful plumes of lilac-rose	.35	3.50
A. simplicifolia—A new, dwarf, Japanese alpine. A	. "	
gem for the rock garden, freely producing panicles of handsome white flowers. 6 inches. Fall delivery	.50	5.00

AUBRETIA—Wall Cress

Hardy Perennial

The rock garden could ill afford to do without its wonderful masses of Aubretia that give such a rare color during April and May and which are among the most easily grown and the most showy of all rock plants. They form spreading tufts and are never seen at their best on the flat, but should be so placed that they may droop over some mound of soil or cover the face of a rock, or fall from the top of a rockery wall. A light loamy soil meets their requirements and after the flowers are over the plants should be cut back well, that the tufts may not become bare in the center. We offer the best of the new, named varieties.

	Each.	Doz.
A. Bridesmaid—Pale rosy blush\$.25	\$ 2.50
A. Cilicica—One of the best—flowers large and freely produced. Lavender with white eye	.25	2.50
A. Craven Gem-New-Very fine deep purple	.25	2.50
A. Fire King-Glowing Crimson-Very fine	.25	2.50
A. H. MarshallRich deep mauve colored flowers; late	.25	2.50
A. J. S. Baker—Purple flowers with white eye	.25	2.50
A. Leichtlini—Bright rose colored flowers	.25	2.50
A. Mrs. Crosfield—A grand purple variety with very large flowers. Earlier than most	.25	2.50
A. Mrs. Lloyd Edwards—A deep reddish purple	.25	2.50
A. Perkinsii—New Violet blue with white eye; compact	.35	3.50
A. Pritchard's A-1—New—Violet flowers; compact habit; one of the finest	.35	3.50
A. Selected Hybrids—From fine large flowered varieties, ranging in color from rose to carmen	.20	2.00
BELLIS—Daisy		
Hardy Perennial		
Nearly everyone is familiar with the common hardy daisy, but the improved form of these delightful plants is a surprise to those who see them for the first time. The size of bloom has been increased until the choicer varieties are as large as small asters. Fine for edgings.		
B. Monstrosum—A monster variety of the hardy English Daisy. New, pure white; 6 inches	.20	\$ 2.00
B. Pink Beauty—Deep pink, very handsome; 6 inches	.20	2.00
B. alpinus—Alpine Daisy—A graceful, spreading plant, growing about six inches high and covered with dainty pink and white single flowers throughout the summer and autumn.	00	9.00
B. cærulescens—An exceptionally dainty little plant,	.20	2.00
flowers white, tinted lilac. Requires a warm site. Fine for the rockery; 3 inches	.25	2.50
B. nivilas—(Miniature Daisy)—Of low, trailing		
growth and white flowers. A gem for the rockery	.35	2.00
R sylvestris New Single deep red blooms	95	9.50

F	Each.	Doz.
BOCCONIA—Plume Poppy		
Hardy Perennial		
B. cordata—A very handsome plant, both in foliage and flower, and fine for planting in the border or in groups in almost any position. Flowers of a creamy white, in large panicles, during July and August	.25	2.50
CAMPANULAS—Bellflowers		
Hardy Perennials and Biennials		
The Bellflowers are for the most part of a very elegant habit and beautiful appearance. The perennial varieties are all of great beauty, the taller ones being suitable for the border and very valuable as cut flowers, while the dwarfer sorts are well adapted for the front of borders and for rockeries. The most of the varieties are easily grown and unless otherwise specified, prefer a well-drained, rather rich sandy loam. Those adapted to rockery culture are among the choicest of perennial plants.		
C. abietina—Very dwarf, tufted growth. Saucer shaped, purple flowers on long stems. Very choice.		
shaped, purple flowers on long stems. Very choice. Rockery	.75	7.50
C. alliarifolia—Showy and choice bell-flower of pyra-		
midal habit. The flowers are white, long tubed and hang in scores from one side of arching stems	.25	2.50
C. barbata—So called because of the hairs inside the		
blooms. It requires a well-drained soil, containing plenty of stones, and more sun than most of bell-		
flowers. The handsome pale blue flowers are produced from May to July, on stems about 1 ft. high	.50	5.00
C. Bowle's Hybrid—A cross between C. carpatica and		0.00
C. rotundifolia. Very new and very choice	.50	5.00
C. Burghalti—A striking plant with long, silky flowers of a lavander blue tint	.25	2.50
C. carpatica—The well-known Carpathian Bellflower and suitable for the front of border and rockery. They		
form large compact tufts and bear a wealth of cup-		
shaped blossoms about 1½ inches across, of a beautiful shade of blue; 1 ft	.25	2.50
C. carpatica alba—The white form. Choice and a		
beautiful companion for the one preceding	.25	2.50
the Campanula specialist. Pure white flowers, erect		
habit very free flowering	50	5 00

	Each.	Doz.
C. carpatica "Meteor"—Another of Grove's introductions and we will give his description: "A charming bellflower with broad, somewhat flattened flowers that are almost white but have an opalescent effect		
caused by the soft blue coloring that shows through from the back of the segments. Plant 10 inches high."	.50	5.00
C. carpatica—"Selected White." An extra large and selected variety of the Carpathian Harebell. Pure		
white flowers, freely produced	.25	2.50
bearing large, flat, saucer-shaped flowers of a pale blue, on slender stems about 1 ft. high	.25	2.50
low, spreading tuft which in June is covered with starry, light blue flowers having a white eye; ex-		
quisite hanging over a rock	.50	5.00
ers with white center. More upright in habit than type. A striking plant	.75	7.50
C. glomerata Dahurica—Large heads of purple flowers. Fine for the border; 2 ft	.20	2.00
C. grandis—A handsome plant with tall spikes of blue flowers C. Grossecki—A handsome species with large leaves,	.25	2.50
heart-shaped and coarsely toothed. Flowers all summer, violet, in long racemes; 5 ft	.20	2.50
flowers in large heads. Flowers from July to September; 4 ft	.25	2.50
C. lactiflora alba magnifica—A beautiful variety from the Imperial gardens of Petrograd, producing spikes 6 ft. high, bearing large, snowy-white flowers. New		
and choice. The true variety	.50	5.00
Flowers in July, blue	.20	2.00
with royal purple flowers, 2 inches long, trumpet-shaped. Suitable for the border or wild garden	.20	2.00
C. muralis—Very dwarf plant covered with blue purple flowers in June. Fine for wall or rock garden	.50	5.00
C. muralis bavarica—An improved form of C. muralis with larger flowers on longer, more upright stems. Easily grown and fine for wall or rockery	.75	7.50

	Each.	Doz.
C. petrae—Very new. Silvery leaves and whorls of showy, yellow flowers	.75	7.50
C. persicæfolia—(Peach Bells)—One of the finest border varieties, bearing large, blue, saucer-shaped flowers on long spikes 3 ft. high. June and July	.20	2.00
C. persicæfolia alba grandiflora—A fine variety of the above, with extra large blossoms. White	.20	2.00
C. persicæfolia Mærheimi—A very fine variety of the Peach Bell, with spikes of double, pure white flowers.C. pusilla—One of the very choice rock bellflowers.	.25	2.50
Strong grower with a profusion of blue flowers during July and August. About three inches high	.50	5.00
C. pusilla "The Major"—Bright blue blossoms. Charming for the rockery or edging	.50	5.00
C. Raddeana—A very handsome perennial, forming a compact bush some 12 inches high, with dark, wiry stems and large purple flowers. Very beautiful if planted near a low shrub in the rockery, to act as a		5.00
C. rotundifolia—The wild blue English harebell; very graceful drooping blue bells, rising from compact tufts of foliage; fine for rockery.		2.00
C. rotundifolia alba—Pure white form of this charming harebell		2.00
C. rotundifolia Hostii—A large form of above with rich blue flowers. Very free		2.50
C. Robsoni—A new hybrid of Scheuchzeri and turbinata with large, deep blue bells on spikes	.35	3.50
C. Scheuchzeri—A very graceful plant with a profusion of lavander blue flowers	.25	2.50
C. Stansfieldii—An easily grown and beautiful variety of bellflower. It forms a dwarf carpet of leaves and bears unusually large blue, somewhat drooping flow-		
ers. Charming in the rockery	.50	5.00
C. Steveni—A beautiful Campanula with dense foliage and flowers of a purplish blue. Very floriferous; 6 in.		5.00
C. tommasiniana—A lovely Italian alpine with narrow blue flowers on slender stems. It forms a dense tuft and flourishes in light soil on rock work; 9 in		7.50
C. turbinata—Similar to C. carpatica but more dwarf, with deep purple, erect flowers		2.00
C. velutina—Downy foliage, large white flowers, tinted pink. Prefers a dry position; 1 ft		5.00

WOLGOTT WORKERIES		
E	ach.	Doz.
C. Vidalli—A very beautiful biennial campanula, forming a pyramidal bush 2 ft. high. Flowers pale blue. Half hardy	.50	5.00
C. waldsteiniana—A Hungarian rock plant of exquisite beauty. It has upright and star-shaped blue flowers on short stems. It does well in a cool part of the rock garden in gritty loam. Scarce and very choice	.75	7.50
CENTRANTHUS—Valerian Fami	1	
Hardy Perennial	пу	
C. ruber—Excellent showy plant for borders, walls, etc. Blooms all summer and is excellent for cutting\$.25 \$	2.50
CERASTIUM—Chickweed		
Hardy Perennial		
C. tomemtosum—(Snow in Summer)—Grey foliage and white flowers. Invaluable for rockeries\$.20 \$	2.00
CHRYSANTHEMUM LEUĆANTHE	MUM	
Shasta Daisy		
Hardy Perennial		
A handsome, strong growing plant for the hardy		
border and valuable for cutting. C. Alaska—Handsome plant, with large, glistening		
white blossoms	.25 \$	2.50
C. Annie House—Very New—Pure white. Three rows of petals. Fine; 2 ft	.35	3.50
C. Kenneth-Very New-Pure white, elegantly la-	.00	0.00
cinated. Very lasting	.35	3.50
C. King Edward VII.—Huge cup-shaped flowers. Very attractive; 2½ ft	.25	2.50
C. Mrs. C. Lowthian Bell-Very large, perfectly	.20	2.00
formed flowers. Continuous bloomer. One of the	0.5	0.50
C. Vomerense—Very New—Pure white. The largest	.25	2.50
and most refined. Undoubtedly the finest of the		
group. Its flowers frequently measure 6 inches	25	2 50
across; 3½ ft	.35	3.50
attractive plant. Forms a rosette of deep green fol-		
iage and in the fall is a mass of white daisies some- times tinged lilac	.25	2.50
times tinged mac	.20	N.00

CLEMATIS—Virgin's Bower

Each.

Doz.

Turay 1 erennai		
C. recta grandiflora—One of the best hardy perennials, A strong, erect growing plant with heads of creamy white flowers. Is best moved when young	.25	2.50
OI ENTAMACILITÀ O 1 O 1		
CLEMATAQUILA—Spurless Colum	ibine	
Hardy Perennial		
This is a new strain exhibited before the Royal Horticultural Society in London and supposed to be a cross between Clematis and Aquilegia. The growth is like the columbine and the flowers are very graceful and entirely without spurs. The colors are similar to		
those in Aquilegia hybrids and all are lovely—pale pink, rose, blue, purple and white\$.25	\$ 2.50
COREOPSIS—Tick Seed		
Hardy Perennial		
 C. grandiflora—A splendid, showy plant for the border or shrubbery. Flowers bright yellow, two or three inches across, all summer. One of the best; 3 ft. C. lanceolata—A very popular plant, with lance-shaped 	.20	2.00
leaves and golden yellow flowers; 2 ft	.15	1.50
DELPHINIUMS—Hardy Larkspi Hardy Perennial	ur	
The Delphinium of today is one of the most beautiful of all flowers. It is most rich in coloring and very stately of habit. The foliage is very attractive and the spikes of bloom freely borne. A border of Delphiniums will often remain in bloom for two months. The culture of Delphiniums is exceedingly simple		-30

Planted in lines or groups as a background for other plants, the effect is exceedingly fine. Copious watering in summer will greatly increase the size of spike and flower and top dressing is strongly recom-

tact with the roots.

and they thrive in almost any position. A rich, friable loam will suit them finely. Dig deeply, add plenty of well-rotted manure and plant about three to four feet apart, being very careful that no manure comes in con-

WOLCOTT NURSERIES		
mended that the soil will not dry out and bake. Coal ashes strewn over the crowns will protect the plant from slugs and worms through the winter and spring. We regret to be obliged to omit our list of named varieties for this season as we have sold ourselves entirely out of stock.	ach.	Doz.
D. Belladonna grandiflora—A much improved form of the Beladonna type bearing large flowers of a beautiful sky blue. Extra fine\$.25	\$ 2.50
D. English Hybrids—From the finest named varieties to be found abroad	.25	2.50
DIAMPHILIC Di-1		
DIANTHUS—Pinks Hardy Perennial		
Pinks comprise a large number of valuable plants for the rockery, wall garden or border. We have formed what we consider a very representative collection of Pinks. The majority are of easy culture and where any special treatment is necessary, we have made mention of the fact. All Pinks should have plenty of sun, unless other-		
wise mentioned, and the majority may be divided after flowering.		
D. alpinus (Alpine Pink)—This is one of the loveliest of all rockery Pinks, with glossy leaves and large flowers of brilliant rose, produced during June and July. It thrives best in loam with some lime added and perhaps a little shade during the hottest part of the summer. A gem for the rock garden; 6 in	.50	\$ 5.00
D. arenarius (Sand-loving pink)—As its name indicates, this Pink delights in a sandy soil and sun. Flowers white with a carmine ring, deeply fringed and fragrant. Evcellent for dry, hot places; 6 in	.20	2.00
D. cæsius grandiflorus—This is the "Cheddar Pink" and one of the best known of the family. It is very campact in growth and makes a cushion of glaucous leaves from which, in May, spring the sweet-smelling, rose-colored flowers, each on its own stem. It varies as much as from four inches to ten inches in height. It is easily grown and very fine for the wall or rock garden; 6 in; true	.50	5.00
D. cruentus—Dense heads of flowers on long stems.		
Deep red. Fine border plant	.25	2.50

	Each.	Doz.
D. deltoides (Maiden Pink)—A beautiful little plant with narrow leaves and bearing a profusion of small crimson flowers during June and July. Easily grown on rockery		2.00
D. deltoides albus—A charming white form of the above variety	.20	2.00
D. deltoides "Brilliant"—A very choice variety of the above, bearing bright rose-colored flowers		2.50
D. Falconeri—A small plant with extremely glaucous foliage, almost blue. Small, cream white blossoms in June. Extremely choice		7.50
D. fragrans—An easy rockery pink, needing sandy loam and grit. It produces white fringed flowers. Fragrant: Sun		2.00
D. gallicus—Flowers purplish crimson, highly scented, on stems about one foot high	.20	2.00
D. giganteus—The tallest of the pinks, growing to a height of 24 to 28 inches. Bluish foliage, flowers of medium size, bright crimson on long, unbranched		
D. glacialis—Although this is listed by some as one of		2.50
the difficult pinks, it has been of the easiest culture with us in gritty sand and peat. It has exquisite rose colored blossoms on short stems and is a real treasure for the rockery. Very rare		7.50
D. graniticus (Granite Pink)—A glorified form of the Maiden Pink, rather taller and with large rose-colored flowers from June Convard. Prefers a sunny place and grifty acid. Propositily for for the roy		
place and gritty soil. Especially fine for the rock garden	.25	2.50
D. kamtschaticus—Distinct rock plant and one of the best introductions of recent years. It is of trailing growth with large, deep pink flowers		2.50
D. neglectus—One of the most beautiful wild Pinks in cultivation. The stems are about 6 inches high with deep rose-colored flowers, frequently borne two on a stem. No flower garden should be without this lovely		
Pink	.50	5.00
D. petraeus—Tufted growth, about a foot in height, bearing a profusion of fringed, rose colored blossoms. Very fragrant		2.50
D. seguieri—A late flowering species with rose crimson blooms on stems about a foot high		2.50

	r 1	-
D. superbus grandiflorus (Fringed Pink)—Very fragrant and bears deeply fringed flowers, ranging from	Each.	Doz.
white to pink or rose	.25	2.50
D. superbus Holtzeri—A very beautiful variety of the above. Blooms early	.25	2.50
D. sylvestris (Wood Pink)—Bluish foliage and salmon pink flowers on stems about a foot high. It likes an open, sunny place in stony loam and a slight covering of stone chips upon the surrounding soil is beneficial	.20	2.00
D. plumarius hybrids (Hardy Garden Pink)—Very easily grown and ranging from white to deep rose. Hardy Pinks are favorites with all gardeners and thrive in a sunny, well-drained position. Very fine strain	.20	2.00
D. plumarius "Cyclops"—Lovely large-flowered single		
Pinks of rose or crimson color; fine for cutting; 15 in. D. plumarus "Homer"—Rosy pink with dark center	.25 .25	2.50 2.50
D. plumarius "Maurice Pritchard"—Perhaps the finest single Pink. Robust constitution. Exceptionally		- 1
large pink flowers. Excellent for cutting	.25	2.50
flowers. Very fragrant	.25	2.50
D. plumarius "Munstead Strain"—A charming class of pheasant-eyed Pinks. Single flowers and very fragrant	.20	2.00
Hardy Carnations—The genuine hardy border carnation is a great addition to the garden. During the last few years great progress has been made in the culture of these plants and we take great pleasure in offering a strain from one of the best known growers in Scotland. They are perfectly hardy and bear in profusion blooms that are quite as large and just as handsome as the greenhouse variety. We guarantee		
these to be the true variety.	.35	3.50
SWEET WILLIAM		
Hardy Perennial		
D. barbatus "Diadem"—Most effective. Rich crimson with large white eye	.20	2.00
D. barbatus "Harlequin"—Each head of flowers in- cludes many shades of color, curiously marked. Ex- ceedingly bright	.20	2.00
cecunigry bright	.20	2.00

D. barbatus "Scarlet Beauty"-An intensely rich deep		
scarlet. Very new and very fine	.25	2.50
D. barbatus "Giant White"—A very fine large flowered pure white variety	.20	2.00
D. Deep Crimson—Very handsome deep red		2.00
D. barbatus Double Mixed—A splendid strain of the old-fashioned double Sweet William	.20	2.00
DIGITALIS—Foxglove		
Hardy Perennial		
The Foxglove has been a favorite in gardens since our grandmother's time and adds beauty and dignity to any planting. The newer varieties show exceedingly choice colorings as well as increased size in spike and bloom and in combination with Larkspur and Canterbury Bells, create a most charming spot in any garden. Their cultivation will give no trouble if given a rich, friable soil and not treated too kindly by covering the crowns for the winter. Cornstalks, so placed that they do not mat down, make an ideal covering, as they must have air during the winter. It is also well to remove some of the largest leaves. D. "Ayshire White" (New White Foxglove)—A very fine variety, producing large spikes of pure white flowers "Giant Primrose"—A beautiful Foxglove with large flowers of cream or buff color	\$.25	\$ 2.50 2.50
D. "Giant Spotted"—Beautiful Spotted flowers in many		2.00
different colors. Very large	.25	2.50
DRABA—Whitlow-Grass		
Hardy Perennial		
One of the important spring flowering plants for the rockery. Very dwarf and compact with numerous small flowers in early spring. They require an open soil and sunny position. D. aizoides—Forms beautiful little rosettes of hairy		
leaves, covered in spring with bright yellow flowers		
about 2 inches high	\$.35	\$ 3.50

WOLCOTT NONSLATES

bronzy-orange. Very lasting	.25	2.50
H. Middendorffii—Rich orange yellow. Very free	.25	2.50

HOLLYHOCK—Althaea Rosea

Hardy Perennial

No hardy garden is complete without the stately and majestic Hollyhock. They lend beauty to the hardy border or shrubbery which cannot be secured with any other plant.

The Hollyhock requires a deeply dug, well enriched soil and should be well supplied with water during the summer months. They will live and thrive for years if protected around the collar with sand or coal ashes dur-

WOLCOTT NURSERIES		
ing winter and if the stem is left a foot or so high instead of being cut to the ground, it will prevent the	ach.	Doz.
crown from rotting.		
So far as we know, there is no absolute cure or pre-		
vention of the Hollyhock disease but we are pleased to		
give our patrons the benefit of a remedy found most effective by the specialists in England.		
"Slack one peck of lime and when cool add one peck		
of soot, 1 pound of flowers of sulphur and half an ounce		
of sulphate of copper (finely powdered). Pass the mix-		
ture through a fine sieve and dust the plants well over		
with it three or four times during the growing season,		
preferably early in the day while the dew is still on the plants."		
We have been fortunate in being able to secure the		
most famous strain of Hollyhocks in the world and it		
affords us much pleasure to be able to offer them to our		
trade for the first time in this country.		
A. Amaranth—Deep amaranth pink. Very distinct. Large and full		
	.35	\$ 3.50
A. Black Knight Improved—Distinct black and best of		
its color	.35	3.50
A. Decora—(New.) Buff, suffused with rosy cerise,		
which is very prominent in late autumn. Large, well filled flower, strong grower and forms a handsome		
spike	.35	3.50
A. Delicata—Soft, delicate, creamy white. Very chaste	.25	2.50
A. Hugh Mitchell—(New.) Lilac mauve, the edge of		
the flower being of a lighter shade. Quite a new color		
in Hollyhocks. Handsome spike and flowers well		
formed	.35	3.50
A. Mulberry Superb—Rich, glowing mulberry	.35	3.50
A. Olivier Chater—Soft, delicate flesh, edged with	•	
white. A most distinct shade of color	.25	2.50
A. Ficifolia hybrida—Figleaved. So called from the		
shape of the leaf. Single blooms in many shades of color	90	9.00
	.20	2.00
A. Allegheny—Large flowers with fringed petals in colors from palest pink to deep red. Mixed colors	.20	2.00

HYPERICUM—St. John's Wort

Hardy Perennial

Very ornamental plants, especially valuable in the rock garden. Their foliage is attractive, habit good and their late flowering makes them especially desirable.

They prefer a rich, sandy loam and if given partial shade, the blossoms last longer.	ach.	Doz.
H. olympicum—Upright growth, about a foot high. Leaves grayish green; flowers large, golden yellow.		
Very handsome\$.50	\$ 5.00
H. polyphyllum—Rare. Glaucous foliage. Flowers yellow in dense terminal cymes. In bloom all summer	.75	7.50
H. repens—Exceedingly choice, prostrate variety, bearing a profusion of golden yellow blossoms. Fine for the rockery	.50	5.00
IBERIS—Candytuft		
Hardy Perennial		
The evergreen Candytufts rank high among the rock garden flowers. They are of half-shrubby growth and in April and May become smothered with bloom. Ordinary well-drained soil suits them and they never look better than when planted above some rock ledge so that the growth may hang over its face.		
I. gibraltarica hybrida—Very handsome variety of Candytuft with flowers shading from deep lavender to white. Blooms nearly all summer. Very strong grower. Young plants transplant best	.35	\$ 3.50
I. Pruiti—A pretty little rock plant with pure white flowers	.25	2.50
I. Sempervirens "Snowflake"—A splendid new variety with large white flowers and evergreen habit	.30	3.00
LATHYRUS—Everlasting Pea		
Hardy Perennial		
L. latifolius "Pink Beauty"—A very desirable hardy climber, bearing a profusion of delicate pink blossoms	.25	\$ 2.50
L. latifolius "White Pearl"—A very lovely pure white variety of the Everlasting Pea and a great improvement on the common L. albus	.35	3.50
L. rotundifolius—A fine variety with clusters of scarlet	.35	3.50
D10000110	.00	0.00

WOLCOTT NURSERIES		
LAVANDULA—Lavander Hardy Perennial	ach.	Doz.
L. vera—The true Lavender of our Grandmothers' gardens, prized for its fragrant leaves as well as for its attractive blue flowers	.25	2.50
LEONTOPODIUM—Edelweiss Hardy Perennial		
Contrary to the popular supposition that, because of the natural habitat of Edelweiss being on high mountains, it is difficult to grow, it is really easy if firmly planted in well-drained, stony loam in a sunny place among the rocks. The woolly flower heads, on stalks about six inches high, rise from a loose tuft of rather narrow grey leaves, in June. It requires lime in the soil \$.25	\$ 2.50
LINARIA—Toad Flax		
Hardy Perennial		
L. alpina—A charming rock garden plant of trailing growth, bearing a profusion of violet flowers with orange throat, like a miniature Snapdragon. Loves a sunny spot in well drained soil	.25	2.50
L. alpina rosea—Handsome variety of the above with pale pink blooms	.25	2.50
LUPINUS—Lupine Hardy Perennial		
The Lupins are well known garden plants, bearing long spikes of pea-like blossoms of various colors. In many gardens Lupins are killed with kindness, as they strongly object to a rich soil. Planted in sandy loam, full sun and having perfect drainage, they will continue to be a joy for many years and one of the very showy subjects of the garden. We are fortunate in being able to offer hybrids		
from one of the most famous Lupine growers in Europe and the choice colors and large blooms will more than		
please our customers. Young plants\$.35	\$ 3.50
LINUM—Flax Hardy Perennial		
Charming border plants of easiest culture and pro- fuse bloomers. Prefer sandy loam in full sun.		
L. flavum—Fine variety with transparent, yellow blossoms. Very attractive\$.35	\$ 3.50

WOLCOTT NURSERIES		
	ach.	Doz.
L. Narbonense—Forms a spreading clump of attractive foliage with a profusion of azure blue flowers with		
white eye. Very handsome for the rockery	.50	5.00
L perenne—Very attractive, both in foliage and bloom.		
Flowers bfeautiful pale blue on slender, graceful stems	.25	2.50
Stellis	.20	2.50
LYCHNIS—Campion		
Hardy Perennial		
A family of very showy and useful plants both for		
the border and rock garden. Very easy culture, thriv-		
ing in almost any soil but requiring full sun.		
L. alpina—A very attractive little plant for the rockery, of tufted growth and bearing heads of pink blos-		
soms in May and June\$.25	\$ 2.50
L. Arkwrightii-A new and very desirable border		
plant, being a cross between L. chalcedonica and L. Haageana. Makes a long and lasting display in		
many new and lovely colors	.50	5.00
L. chalcedonica—Brilliant scarlet; very showy	.20	2.00
L. chalcedonica rosea—A very attractive variety of the above, bearing large heads of salmon pink blossoms	.25	2.50
L. Haageana—Brilliant orange scarlet blossoms in	.20	2.50
June and July	.20	2.00
L. Lagascae—An exquisite little plant for the rockery. Forms small clumps about 4 inches high, covered with		
showy blossoms of carmine rose	.50	5.00
MERTENSIA—Blue Bells		
Hardy Perennial		
One of the most attractive early blooming plants		
One of the most attractive early blooming plants and especially useful as it thrives best in shade. Should		
be given a very rich soil and be left undisturbed for years.		
M. primuloides—A rare variety. Dwarf growth and		
plum colored flowers	.50	5.00
M. sibirica—Leaves somewhat fleshy, flowers purplish blue in long racemes	.25	2.50

and deep carmine at the base. One of the best	.25	2.50
P. "Mrs. Perry"—Orange apricot shade	.25	2.50

HARDY PHLOX

2.00

Perennial

These beautiful hardy border plants are among the most effective things in the garden during the late summer and fall months. The varieties have been much improved during the past few years, both as to color and size of pip. To be at their best, they require soil which has been deeply enriched and plenty of water during the blooming period. It is also well to remember that they should never be allowed to go to seed and should be divided every three years, or they will become small and in not a few cases, change their color.

Finest mixed seedlings, from named varieties.....

· ·	Each.	Doz.
We have tried to confine our list to the very best		
of the numerous varieties offered and can safely say		
there is not a poor variety in the lot. Baron von Dedem—Large, handsome spike; brilliant		
blood red flower\$.20	\$ 2.00
Elizabeth Campbell-One of the finest. Large flower		
and spike. Bright salmon pink with dark red eye	.25	2.50
Eugene Danzenvillier-Lilac, shading to white at the		
edges	.20	2.50
Europa—A new variety, white with large crimson-carmine eye. Very large flower and truss	.25	2.50
Frau Anton Buckner—The finest white phlox. Strong	.20	2.30
habit and flowers of an enormous size	.20	2.00
Gefion—Peach-blossom pink with bright rose eye. Very

PHLOX ARENDSI		
Hardy Perennial		
This new strain of early flowering Phlox originated		
from crossing P. canadensis and P. decussata. The		
plants are vigorous, from 12 inches to 24 inches high and produce masses of bloom from the latter part of		
May until July.		
Amanda-Bright lilac with deeper eye. Very dwarf\$.25	\$ 2.50
Charlotte—Pale lilac with conspicuous dark eye; 15 in.	.25	2.50
Kathe—Rosy purple with a dark eye; 20 in	25	2.50
Louise—Bright lilac with carmine eye. Very strong		
growth; 24 in	.25	2.50
PHLOX SUBULATA—Moss Pin	k	
Hardy Perennial		
The creeping Phloxes are easily grown in full sun		
and make a very valuable addition to either the hardy		
garden or rockery because of their sheets of color in early spring.		
They form creeping masses of moss-like foliage,		
smothered with large, brilliant flowers. We list a few	*	
of the best.		
P. Daisy Hill—Large, deep rose blossoms\$.25	\$ 2.50
P. G. F. Wilson—Delicate blossoms of pale lilac	.25	2.50
P. The Bride—Purest White	.25	2.50
PHYSOSTEGIA—False Dragon-H	ead	
Hardy Perennial		
P. Virginica Grandiflora—A plant much valued for		
hardy borders, blooming as it does in August when		
flowers are scarce. In good deep soil, will attain a height of over seven feet; bears long spikes of bright		
but soft pink flowers	.15	1.50
P. Virginica Grandiflora Alba—Pure white, very at-		
tractive	.15	1.50

PLATYCODON—Chinese Bellflower

Hardy Perennial

These are closely allied to the Bellflower family and derive the name of "Balloon Flower" from the shape of the buds. They enjoy a very rich, loamy soil and are

Primula denticulata

म	ach.	Doz.
most attractive plants for the border, bearing blue blos-	ac	202.
soms for about a month or six weeks, beginning about		
the middle of July. They are best planted when quite		
young, as they do not bear disturbing after once established.		
P. Maresii—A splendid variety of dwarf habit with		
very large flowers of a purplish blue color	.25	\$ 2.50
P. Grandiflorum—Very handsome variety, about 2 it.		•
high, blooming in July and August. Flowers a deep		
blue two or three inches across	.25	2.50
POLEMONIUM—Jacob's Ladden	r	
Hardy Perennial		
Excellent border plants with strikingly handsome		
and effective blossoms. The foliage is also very hand-		
some, closely resembling some of the ferns. They flour-		
ish in rich, deep, well-drained loam and prefer partial shade.		
P. Cæruleum Grandiflorum—A very large form of P. Cæruleum having long spikes of large blue blossoms\$	15	\$ 1.50
P. Cæruleum Grandiflorum Album—A fine white form	.10	Ψ 1.50
of the above	.15	1.50
POTENTILLA—Strawberry Flow	or	
Hardy Perennial	CI	
Very effective plants for the hardy garden with		
strawberry-like leaves and showy blossoms which con-		
tinue for a long period. Easily cultivated, doing well in		
an open position. Fine for cutting.		
P. formosa—Crimson; large, single blossoms\$.25	\$ 2.50
P. nepalensis—Beautiful rose color		2.50
P. Miss Willmott—Deep cherry red	.25	2.50
POLYANTHUS—Bunch Primros	e	
Hardy Perennial		
The Polyanthus is an indispensable spring flower		
and should be used largely in flower beds and borders,		
also wild gardens and rockeries. It likes an open, half-		
shady position in rich soil and under such conditions will bear flower stems a foot high.

PRIMULA—Primrose Hardy Perennial		
A race of plants little known in America, but forming one of the most attractive features of the spring garden. They are perfectly hardy in our Michigan climate and once established are as sturdy as our oaks. The different varieties range in size from four inches to three feet, and in time of blooming from early April until late summer.		
Do not try to compel Primroses to grow in hot, sandy places for you will only meet with failure. They need at least partial shade and while they enjoy mois-		
ture at the roots, they must have good drainage or they will rot at the crown. Also be particular when planting that no dirt is left on the crown, as it seems to smother		
them. We have found cinders excellent for drainage. In fact, the majority of rock plants seems to like cinders mixed with the soil.		
P. auricula alpina—One of the treasures of the rock garden. The growth is very attractive, forming rosettes of thick leaves, sometimes farinose or mealy. From these rosettes the flower stalks rise to a height of six or eight inches, bearing heads of bloom of various colors and exceedingly fragrant. Our strain is		
from the great Primula specialist in Scotland and comprises a wide range of colors. Their native home is in the rocks, where they are constantly supplied with moisture at their roots. Give		
them a mixture of peat, leaf mould and sandy loam with plenty of stones mixed with it	.\$.50	\$5.00

VIOI A Tufted Dangy		

IULA—I uited Pansy

Hardy Perennial

The Viola is not as well known in America as it should be for it is perfectly hardy in well-drained soil and a most profuse bloomer from early Spring until Fall. It needs deep, well-enriched soil and considerable sun, with plenty of water. Ideal for carpeting rose beds as the roses afford just enough shade. The colors are varied, as in Pansies, but much more refined and need to be grown to be appreciated.

Do not allow to seed, as it will stop the bloom and early in September cut back all straggling growth,

when the plant will make new tufts.		
V. Ariel-Mauve, beautifully shaded with white\$.35	\$ 3.50
V. Aurora—Bluish purple. Immense bloomer	.35	3.50
V. Blanche—Creamy white; very large	35	3.50
